

## EIS Empowers People To Be Productive

 <p>Global Journal of Enterprise Information System [GJEIS] Volume 3, Issue III, July-Sep 2011 EIS Empowers People To Be Productive</p>	<h3>Epistle</h3>	 <p><b>Dr. Subodh Kesharwani</b> Editor-In-Chief [GJEIS] 1st Oct 2011</p>
---	------------------	---

Today's economy is on trembling ground and the immediate future looks like more of the unchanged. Information is at the heart of today's business, and the all-pervasive impact of information technology in harnessing, collating and processing huge volumes of information is high-tech. The purpose of any information system is to maintain the activities of an organization.

Consequently it is essential to have a high-quality clutch of information technology aspects associated to information systems as well as the business individuality. This particular issue accentuate, on a people as they are suppose to be an important constituent of technology implementation, worked as a performance enabler, and finally aimed at bringing together active researchers in an area of information systems.

This present issue will be of interest to information technology professionals, especially those working on systems integration, databases, decision support systems or electronic commerce. It will also be of use to middle managers who need to work with information systems and require knowledge of current trends in development methods and applications.

GJEIS Invites Empirical Articles on the focused theme through its online Open Source software which is backed by a Stanford University, Arizona State University and Simon Frazor University
