

Reviewer Memorandum

Volume-13, Issue-1, Jan-March 2021

Assessment and evaluation is a good feature and scholars are attentive of it in their research work when they admit reviewers in assessing their works as a professional practice mode. In the similar stratum some researchers acknowledge anonymous reviewers for reviewing their manuscripts.

In our opinion it is a marvelous voluntarily works to review a paper by a reviewers to whom paper allocated and on the other hand become a moral duty in our part as an editor to acknowledge all those editors/reviewers know that they have been acknowledged. At the outset editorial team highly indebted to so Review Process which occurs during a time frame between January 2021- March 2021.

There are three category of review available which we publish in gist format under following three heads:

- **Internal Assessor Statement:** Internal Assessors are those personnel who smooth the progress of the Paper Assessment process by performing in-house evaluation in advance of an External Assessor's validated assessment fieldwork. Internal Assessors are part of an "Internal Assessment Function." This function will typically be an Internal Audit Department or a team of consultants but is not required to be if specific objectivity, competence, and application approval requirements are met.
- **External Critic (National):** It refers to the authenticity of the document. Once a document has been determined to be genuine (external criticism), researchers need to determine if the content is accurate (internal criticism).
- **Outer Reviewer's (Global) observation:** Reviewing that many papers are a huge burden, and in spite of a preliminary bidding process, every review member is assigned at least a few papers outside their areas of expertise which provide long-term monitoring evaluation.

We are grateful to all the reviewers for assessing a paper Openly as well as Blindly, on the other hand there were some articles which require double and triple blind review. The editorial office gratefully acknowledges the assistance of the following people, who reviewed manuscripts for the Jan-March 2021 cycle. The Letter of Appreciation and Certificates would be given to all of them as a token of love for sparing their precious time in reviewing and contributing academic input.
